Migration and Compatibility

The following are instructions on how to migrate from a previous release to version 1.3.0 of TIBCO ActiveMatrix Adapter for Files for Unix/Win (TIBCO Business Studio).

To upgrade projects created in previous release, import projects to TIBCO ActiveMatrix Adapter for Files for Unix/Win (TIBCO Business Studio) 1.3.0. For more details about import procedures, see the TIBCO ActiveMatrix BusinessWorks™ documentation.

Migrating Projects from BusinessWorks 5 to BusinessWorks 6

If you want to migrate an adapter project from TIBCO ActiveMatrix BusinessWorks 5 to TIBCO ActiveMatrix BusinessWorks 6, you have to complete the following steps:

1. In TIBCO Designer™, migrate the project to the latest version of the runtime adapter, and then validate the project.

   Before preparing a project for migration, ensure that no error occurs when validating it in TIBCO Designer. For more information, see "Validating Projects" in *TIBCO Designer User's Guide*.

2. In TIBCO Business Studio™, migrate the validated projects.

   For more details about migration procedures, see the TIBCO ActiveMatrix BusinessWorks documentation.

When you migrate a project, note the following list:
- You can migrate a TIBCO ActiveMatrix BusinessWorks 5 project to a TIBCO ActiveMatrix BusinessWorks 6 project, but you cannot migrate in reverse.

- TIBCO Business Studio does not support the importing of .dat files. To migrate a project stored in a .dat file, you have to import the file in TIBCO Designer and save it as a multi-file project.

- The name of a project migrated to TIBCO Business Studio cannot contain any special characters such as: (space) ! $ % & + . / @ \ ~

Closed Issues
