# Introduction

---

This chapter introduces you to the conventions followed by the error codes and messages.

## Error Codes Naming Convention

Product execution errors, warnings, and information are reported through detailed log messages that can help trace the cause of the issue. These messages follow a naming convention that indicates the component and log level for each message. The log levels allow you to capture different granularity of messages for different loggers.

Messages returned by the software consist of a code and an associated message.

The message code consists of two parts, a component ID and a 6-digit number, separated by a hyphen (-). The component ID indicates the component that reported the message and the 6-digit number is a numerical range that indicates the logger level.

The following table lists the component IDs and their descriptions.

*Error Codes Naming Convention*

Component ID	Description
TIBCO-AMX-ADMIN	TIBCO ActiveMatrix Administrator.
TIBCO-AMX-BT-SOAP	SOAP Binding Type.
TIBCO-AMX-CF	Component Framework.
TIBCO-AMX-HPA	Host Platform Adapter.
TIBCO-AMX-IT-JAVA-SPRING	Java or Spring Implementation Type.
TIBCO-AMX-SR-HTTP	Shared Resource - HTTP.
TIBCO-AMX-SR-JDBCXA	Shared Resource - JDBC Transaction.

Component ID	Description
TIBCO-AMX-SR-THREADPOOL	Shared Resource - Threadpool.

# TIBCO ActiveMatrix Administrator Codes

---

This section describes the error codes and messages that can be returned by TIBCO ActiveMatrix Administrator.

## Environment

### *Administrator - Environment*

Error Code	Description
TIBCO-AMX-ADMIN-020001	Environment name [{0}] includes spaces, which are not allowed.
TIBCO-AMX-ADMIN-020002	Env exists with the name {0}.
TIBCO-AMX-ADMIN-020003	Failed to create a products folder.
TIBCO-AMX-ADMIN-020004	permissionService is not injected.
TIBCO-AMX-ADMIN-020005	The "Secure" flag cannot be changed after the creation of the environment.
TIBCO-AMX-ADMIN-020006	No resource template service was injected into env service. Cannot create a messaging bus configuration.

Error Code	Description
TIBCO-AMX-ADMIN-020007	SSL must be enabled in a secure environment.
TIBCO-AMX-ADMIN-020008	Error while generating the key alias password for the SSL Client resource template used in {0}.
TIBCO-AMX-ADMIN-020009	Error while updating the messaging bus configuration, not all components are stopped.
TIBCO-AMX-ADMIN-020010	envDesc.
TIBCO-AMX-ADMIN-020011	Environment.
TIBCO-AMX-ADMIN-020012	envIds.
TIBCO-AMX-ADMIN-020013	envId.
TIBCO-AMX-ADMIN-020014	desc.
TIBCO-AMX-ADMIN-020015	The current user does not have {0} permission.
TIBCO-AMX-	A component named {0} in application {1} on node {2} is in {3} state.

Error Code	Description
ADMIN-020016	
TIBCO-AMX-ADMIN-020017	Not authorized to delete Environment {0}.
TIBCO-AMX-ADMIN-020018	Called getAllEnvDescs.
TIBCO-AMX-ADMIN-020019	Called getSpecifiedEnvDescs with {0} values.
TIBCO-AMX-ADMIN-020020	Called setModification with null environment.
TIBCO-AMX-ADMIN-020021	Could not create Single Sign-On related resources as Trinity Credential Server host [{0}] / port [{1}] is invalid.
TIBCO-AMX-ADMIN-020022	Failed to retrieve resource template.
TIBCO-AMX-ADMIN-020023	Trinity Credential Server details: host [{0}] port [{1}].
TIBCO-AMX-ADMIN-020024	Creating Single Sign On related resource templates.
TIBCO-AMX-ADMIN-	May not delete the system environment.

Error Code	Description
020025	
TIBCO-AMX-ADMIN-020026	Environment has been deleted already.
TIBCO-AMX-ADMIN-020027	Environment is deleted successfully.
TIBCO-AMX-ADMIN-020028	Do not have permission to delete this environment.
TIBCO-AMX-ADMIN-020029	Removed successfully.
TIBCO-AMX-ADMIN-020030	Not found.
TIBCO-AMX-ADMIN-020031	The host has existing nodes.
TIBCO-AMX-ADMIN-020032	Validation to delete env {0} failed. There are {1} promoted references that are wired to other environment's promoted services.
TIBCO-AMX-ADMIN-020033	Updating messaging bus configuration for environment {0}.
TIBCO-AMX-ADMIN-020034	No message bus component in the platform application.

Error Code	Description
TIBCO-AMX-ADMIN-020035	The message bus configuration property is not defined.
TIBCO-AMX-ADMIN-020036	Cannot resolve SVars {0} at enterprise level.
TIBCO-AMX-ADMIN-020037	Failed to get entries from a keystore. Error getting the instance of JCEKS keystore.
TIBCO-AMX-ADMIN-020038	Failed to get entries from a keystore. Error loading keystore URL.
TIBCO-AMX-ADMIN-020039	Successfully connected to "{0}" in non-SSL mode.
TIBCO-AMX-ADMIN-020040	Failed the connection test to "{0}" in non-SSL mode.
TIBCO-AMX-ADMIN-020041	Successfully connected to "{0}" in SSL mode.
TIBCO-AMX-ADMIN-020042	Failed the connection test to "{0}" in SSL mode.
TIBCO-AMX-ADMIN-020043	Environment name "{0}", Environment description "{1}", Environment contact "{2}".
TIBCO-AMX-	Environment id "{0}", Environment name "{1}".

Error Code	Description
ADMIN-020044	
TIBCO-AMX-ADMIN-020045	Environment id "{0}", Environment name "{1}", Host id "{2}", Host name "{3}".
TIBCO-AMX-ADMIN-020046	Host id "{0}", Host name "{1}", Environment id "{2}", Environment name "{3}".
TIBCO-AMX-ADMIN-020047	Host id "{0}", Host name "{1}", Environment id "{2}", Environment name "{3}".
TIBCO-AMX-ADMIN-020048	Environment id "{0}", Environment name "{1}".
TIBCO-AMX-ADMIN-020049	ResourceTemplate id "{0}", ResourceTemplate name "{1}", Environment id "{2}", Environment name "{3}".
TIBCO-AMX-ADMIN-020050	Environment id "{0}", Environment name "{1}", emsserverurl "{2}", connectionUsername "{3}", isSslDebugTrace "{4}".
TIBCO-AMX-ADMIN-020051	Environment id "{0}", Environment name "{1}", Environment description "{2}", Environment contact "{3}".
TIBCO-AMX-ADMIN-020052	The updated values for Environment id "{0}", Environment name "{1}" are: "{2}".
TIBCO-AMX-ADMIN-	Environment name cannot contain the underscore '_'.

Error Code	Description
020053	
TIBCO-AMX-ADMIN-020054	Environment name is missing.
TIBCO-AMX-ADMIN-020055	Environment name "{0}" is invalid! It contains an invalid character: "{1}".
TIBCO-AMX-ADMIN-020056	Environment name "{0}" is invalid because it contains two consecutive dot characters. Consecutive dot characters are not allowed in the Environment name.
TIBCO-AMX-ADMIN-020057	Environment name "{0}" is invalid because the name ends with a dot character. The environment name cannot end with a dot character.

Error Code	Description
AMX-ADMIN-012110	
TIBCO-AMX-ADMIN-012111	No value was specified for one or more optional properties of this application.
TIBCO-AMX-ADMIN-012112	When a property is marked as optional, it means that the application should deploy successfully even when its values are empty. However, if you find that this deployment fails, review with the application developers whether the property should have been marked as required.
TIBCO-AMX-ADMIN-012113	While the wizard would normally auto-create it from the resource template “{0}”, in this case it would result in a port conflict. Exit the wizard and either explicitly create the resource instance OR use substitution variables for port if distributing the application to multiple nodes.
TIBCO-AMX-ADMIN-012114	If you wish to choose a different resource template from “{0}”, we provide an opportunity to do so. However, if you intend to reuse the same resource template on multiple nodes the best practice is to use a substitution variable instead of a fixed port number in the resource template “{1}”. To follow the best practice, exit the wizard, set up the resource template appropriately, then deploy this application.
TIBCO-AMX-ADMIN-012115	While the wizard would normally auto-install the resource instance “{0}”, in this case it would result in a port conflict, Exit the wizard to resolve this problem.
TIBCO-AMX-ADMIN-012116	If you wish to choose a different resource instance than “{0}”, please go back to the properties setting. However, if you intend to reuse the same resource template on multiple nodes the best practice is to use a substitution variable instead of a fixed port number in the resource template. To follow the best practice, exit the wizard, set up the resource template appropriately, then deploy

Error Code	Description
	this application.
TIBCO-AMX-ADMIN-012117	No permission to create and install resource instances.
TIBCO-AMX-ADMIN-012118	You can choose an existing resource instance, or exit the wizard, set up the resource instance appropriately, then deploy this application.
TIBCO-AMX-ADMIN-012119	Since the value of “port” in the resource template “{0}” is using a substitution variable, which cannot be resolved, the app wizard cannot create the resource instance automatically.
TIBCO-AMX-ADMIN-012120	If you wish to choose a different resource template other than “{0}”, we provide an opportunity to do so. However, if you wish to use the resource template “{1}”, exit the wizard, create substitution variables appropriately, then deploy this application.
TIBCO-AMX-ADMIN-012121	Service “{0}” is no longer present because of a version upgrade. Thus, its promotion to the environment as “{1}” is being removed.
TIBCO-AMX-ADMIN-012122	Reference “{0}” is no longer present because of a version upgrade. Thus, its promotion to the environment as “{1}” is being removed.
TIBCO-AMX-ADMIN-012123	Service “{0}” that was promoted to the environment as “{1}” is no longer present because of a version upgrade. Remove the promotion and then re-deploy or deploy with force.

Error Code	Description
TIBCO-AMX-ADMIN-012124	Reference "{0}" that was promoted to the environment as "{1}" is no longer present because of a version upgrade. Remove the promotion and then re-deploy or deploy with force.
TIBCO-AMX-ADMIN-012125	Cannot deploy because there are upgraded components preparing to undeploy. Wait for the components to undeploy.
TIBCO-AMX-ADMIN-012126	Cannot deploy because there are upgraded components that are not running. Start the application and then try deploying again.
TIBCO-AMX-ADMIN-012127	Application {0} is critical for system functioning and cannot be deleted or undeployed.
TIBCO-AMX-ADMIN-012128	Due to upgrade, the promotion to environment for reference {0} cannot be kept, and has been removed.
TIBCO-AMX-ADMIN-012129	Due to upgrade, the promotion to environment for reference {0} cannot be kept. Remove this promotion manually and deploy again.
TIBCO-AMX-ADMIN-012130	Due to upgrade, the promotion to environment for service {0} cannot be kept, and has been removed.
TIBCO-	Due to the upgrade, the promotion to environment for service {0} cannot be kept.
