Installation Overview

This document explains how to install and configure TIBCO Business Studio™ iProcess® Add-in 3.5.1.

TIBCO iProcess Requirements

TIBCO Business Studio is forwards compatible with the following iProcess versions. To take full advantage of the features in any component, you need to specify the latest version of it in your preferences.

TIBCO Business Studio is compatible with certain earlier versions of iProcess software not listed in this table. However, to ensure you have the latest service pack bug fixes and security updates, use the versions listed.

TIBCO Business Studio	TIBCO iProcess Add-In	TIBCO iProcess Engine	TIBCO iProcess Technology Plug-ins	TIBCO iProcess Web Services Plug-in	TIBCO iProcess Workspace (Browser)	TIBCO iProcess Workspace (Windows)	TIBCO iProcess Workspace Lite	TIBCO iProcess Conductor
3.5.2	3.5.1	11.0+	11.2+	10.6.1+	11.3+	11.0+	1.2	11.2+
3.5.2	3.5	11.0+	11.2+	10.6.1+	11.3+	11.0+	1.2	11.2+
3.4	3.4	11.0+	11.2+	10.6.1+	11.3+	11.0+	1.2	11.2+

TIBCO iProcess Workspace (Windows) should match TIBCO iProcess Engine in terms of its first two digits.

If you have any queries regarding product compatibility with this version of TIBCO Business Studio, please contact TIBCO Support for further assistance.

Installing TIBCO Business Studio iProcess Add-in

This section describes how to install TIBCO Business Studio iProcess Add-in 3.5.1.

Two installation modes are available: GUI and silent.

Before you install this add-in, you must have installed TIBCO Business Studio 3.5 BPM Edition or Silver BPM Edition. See the *TIBCO Business Studio Installation* for more information.

If you choose to install TIBCO Business Studio and TIBCO Business Studio iProcess Add-in at the same time, unzip both to the same temporary directory and then run the TIBCOUniversalInstaller as normal.

The installation dialog will be the same as documented here, and you will see both TIBCO Business Studio 3.5.2 and TIBCO Business Studio iProcess Add-in 3.5.1 listed on the Welcome Screen.

Install TIBCO Business Studio using one of the following modes:

- [Installing on Windows on page 2](#)
- [Installing on Linux on page 3](#)
- [Installing in Silent Mode \(Windows Platforms\) on page 5](#)
- [Installing in Silent Mode \(Linux Platforms\) on page 6](#)

Installing on Windows

1. Log into the system on which you want to install TIBCO Business Studio iProcess Add-in.
2. Extract the TIBCO Business Studio iProcess Add-in exe file to the location to which you want to extract the installation files. The exe file will be named TIB_bstudio-iprocess_3.5.1_win_x86.exe.
3. Double-click the TIBCO Business Studio iProcess Add-in installer (TIBCOUniversalInstaller.exe).
4. After a short delay while the installer initializes, the **Welcome** dialog is displayed.
5. Review the information in the **Welcome** dialog and click **Next**. The **License Agreement** dialog is displayed.

6. Review the terms of the license agreement and, if you agree to them, click **I accept the terms of the license agreement**. Then click **Next** to continue with the installation.

If you do not agree to the terms of the license agreement, click **Cancel** to exit from the installation process.

The **Installation Profile Selection** dialog is displayed.

7. **TIBCO Business Studio™ iProcess® Add-in** is already selected in the left hand pane. The right hand pane displays the features for the selected persona.

Click **Next**.

8. The **TIBCO Installation Home** dialog appears. Select **Use an existing TIBCO_HOME**. From the drop-down list, you need to choose the installation location (environment) that already contains the compatible version of TIBCO Business Studio

You must choose the location that contains TIBCO Business Studio for your installation. If you do not, you will see an error message, and you can choose between **Exit Installation** or **Change My Installation Options** (which will take you back to the **Installation Profile Selection** dialog and allow you to select your installation options again).

Click **Next**.

9. After the installer configures your installation choices, the **Pre Install Summary** dialog is displayed. Review the information displayed in the dialog and make sure that it is correct.

If you want to change any of your choices, click **Back** to step back through the dialogs to the appropriate point. You can then restart the installation process from that point.

10. When you are satisfied with your choices, click **Install**.
11. The installer now performs the necessary installation tasks. When installation has completed, the **Post-Install Summary** dialog is displayed. Click **Finish** to exit from the installer.

Installing on Linux

1. Log in to the system on which you want to install TIBCO Business Studio iProcess Add-in.

2. Extract the TIBCO Business Studio iProcess Add-in zip file to the location to which you want to extract the installation files. The zip file will be one of the following:
 - TIB_bstudio-iprocess_3.5.1_linux24gl23_x86.zip
 - TIB_bstudio-iprocess_3.5.1_linux24gl23_x86_64.zip
3. Double-click the TIBCO Business Studio iProcess Add-in installer (TIBCOUniversalInstaller.exe).
4. After a short delay while the installer initializes, the **Welcome** dialog is displayed.
5. Review the information in the **Welcome** dialog and click **Next**. The **License Agreement** dialog is displayed.
6. Review the terms of the license agreement and, if you agree to them, click **I accept the terms of the license agreement**. Then click **Next** to continue with the installation.

If you do not agree to the terms of the license agreement, click **Cancel** to exit from the installation process.

The **Persona Selection** dialog is displayed.

7. **TIBCO Business Studio™ iProcess® Add-in** is already selected in the left hand pane. The right hand pane displays the features for the selected persona. Click **Next**.
8. The **TIBCO Installation Home** dialog appears. Select **Use an existing TIBCO_HOME**. From the drop-down list, you need to choose the installation location (environment) that already contains the TIBCO Business Studio

You must choose the location that contains TIBCO Business Studio for your installation. If you do not, you will see an error message, and you can choose between **Exit Installation** or **Change My Installation Options** (which will take you back to the **Installation Profile Selection** dialog and allow you to select your installation options again).

Click **Next**.

9. After the installer configures your installation choices, the **Pre Install Summary** dialog is displayed. Review the information displayed in the dialog and make sure that it is correct.

If you want to change any of your choices, click **Back** to step back through the dialogs to the appropriate point. You can then restart the installation process from that point.

10. When you are satisfied with your choices, click **Install**.

11. The installer now performs the necessary installation tasks. When installation has completed, the **Post-Install Summary** dialog is displayed. Click **Finish** to exit from the installer.

Installing in Silent Mode (Windows Platforms)

The following procedure explains how to install TIBCO Business Studio iProcess Add-in in silent mode on Windows platforms. The `TIBCOUniversalInstaller.silent` file is packaged in the directory that contains the universal installer. You must edit the file with information for your environment before launching the silent installation. The file includes comments that describe the installation properties you can set.

While you can use the `TIBCOUniversalInstaller.silent` file, it's good practice to copy the file to a different name and use that file for the silent install.

If errors occur during installation, they will be listed in the installation log file (see the `User_Home/.TIBCO` directory).

1. Open the distribution DVD or download the TIBCO Business Studio iProcess Add-in product package.
2. Extract the TIBCO Business Studio iProcess Add-in product archive file to a temporary directory.
3. Using a console window, navigate to the temporary directory that contains the universal installer.
4. Copy the `TIBCOUniversalInstaller.silent` file and name the file.
5. Using a text editor, open the copied file and update the install location, and the list of features to install.
6. Run the installer:

```
TIBCOUniversalInstaller -silent -V  
responseFile="myfilename.silent"
```

If you are using the `TIBCOUniversalInstaller.silent` file, you need not supply the file name and can run: **TIBCOUniversalInstaller -silent**.

If you are installing Asset Central and Windows firewall alerts are displayed, click **Unblock** so Asset Central can be installed.

A line similar to the following is written to the installer log file when installation completes:

```
Install, com.tibco.installer.util.TIBCOInstaller, dbg.Debug,  
The installation has completed. Please check the log file for  
additional information.
```

Installing in Silent Mode (Linux Platforms)

The following procedure explains how to install TIBCO Business Studio iProcess Add-in in silent mode on Linux platforms. The `TIBCOUniversalInstaller.silent` file is packaged in the directory that contains the universal installer. You must edit the file with information for your environment before launching the silent installation. The file includes comments that describe the installation properties you can set.

While you can use the `TIBCOUniversalInstaller.silent` file, it's good practice to copy the file to a different name and use that file for the silent install.

If errors occur during installation, they will be listed in the installation log file (see the `User_Home/.TIBCO` directory).

1. Open the distribution DVD or download the TIBCO Business Studio iProcess Add-in product package.
2. Extract the TIBCO Business Studio iProcess Add-in product archive file to a temporary directory.
3. Using a console window, navigate to the temporary directory that contains the universal installer.
4. Copy the `TIBCOUniversalInstaller.silent` file and name the file.
5. Using a text editor, open the copied file and update the install location, and the list of features to install.
6. Run the installer:

```
./TIBCOUniversalInstaller-lnx-x86.bin -silent -V  
responseFile="myfilename.silent"
```

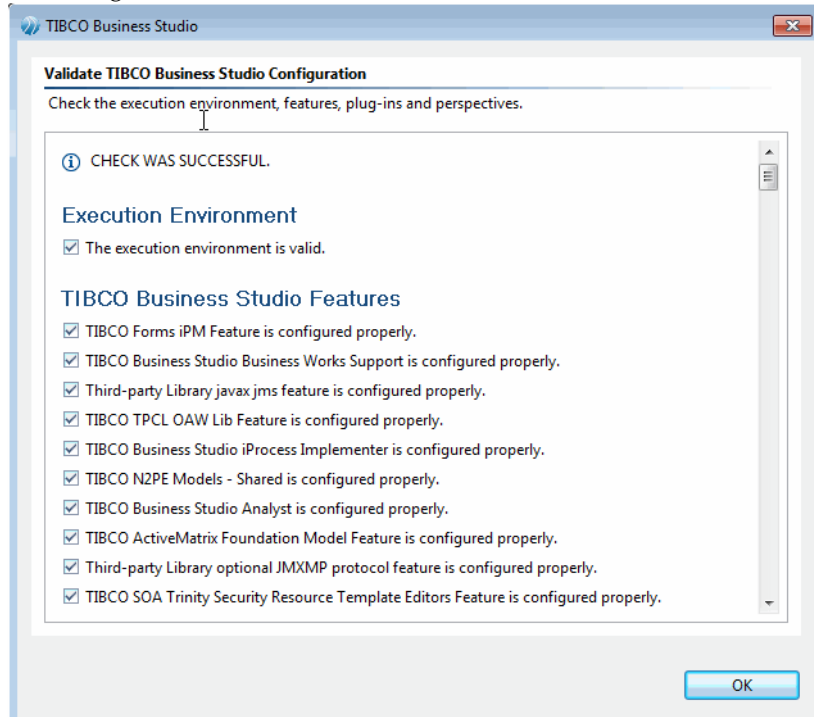

7. If you are using the `TIBCOUniversalInstaller.silent` file, you need not supply the file name and can run: **`./TIBCOUniversalInstaller-lnx-x86.bin -silent`**.

A line similar to the following is written to the installer log file when installation completes:

```
Install, com.tibco.installer.util.TIBCOInstaller, dbg.Debug,  
The installation has completed. Please check the log file for  
additional information.
```

Checking that your Installation is Successful

1. Start up TIBCO Business Studio.
2. Ensure that your installation of TIBCO Business Studio iProcess Add-in was successful. To do this, validate the installation by selecting **Help > Validate TIBCO Business Studio Configuration**. You should see output similar to the following.

If you do not see the feature **TIBCO Business Studio iProcess Implementer is configured properly**, in the list, the installation of TIBCO Business Studio iProcess Add-in was not successful, and you should check that you installed the add-in in the same directory as your TIBCO Business Studio installation. Installation logs are now contained in a separate directory. Please contact TIBCO Technical Support if you require assistance with using the logs.

Uninstalling TIBCO Business Studio iProcess Add-in

If you want to uninstall TIBCO Business Studio iProcess Add-in from your system, perform the following steps:

Linux

Use the uninstaller provided with TIBCO Business Studio.

Windows

Either:

- use the uninstaller provided with TIBCO Business Studio or
- Remove the installation using the **Add/Remove Programs** option on your PC (**Programs and Features** on Windows Vista and Windows 7).

When you installed TIBCO Business Studio iProcess Add-in, if the installer detected a suitable Java Virtual Machine (JVM), that JVM is used by TIBCO Business Studio iProcess Add-in. The uninstallation will fail if you remove the JVM used by TIBCO Business Studio iProcess Add-in before removing TIBCO Business Studio iProcess Add-in. If this happens, you can use the command line to uninstall with the **-is:javahome** option. To do this, navigate to the *installation_environment_uninstall* folder and enter the following command:

```
universal_uninstall.exe -is:javahome
```

Using the Uninstaller

To use the uninstaller:

1. Log in to the system on which you want to uninstall software.
 - On Windows log in as a user with Administrator privileges. You must have Administrator privileges to uninstall this software.
 - On Linux, you should uninstall as the same user who did the installation. If more than one product installation has been made to the same environment and you want to uninstall them all, you should uninstall using the root user.
2. Do one of the following:

Windows:

- From the Windows **Start** menu, select **Programs > TIBCO > *installation_environment* > Uninstall**.
- Navigate to the *installation_environment*_uninstall folder and run **universal_uninstall.exe**.

Linux:

- Navigate to the *installation_environment*/_uninstall folder and run **universal_uninstall.bin**.

3. The **Welcome** dialog is displayed. Click **Next**.
4. Select **Custom Uninstall** (to choose products in this environment to uninstall).
5. The **Product Uninstall Selection** dialog is displayed.

Select the products you want to uninstall and click **Next**.

6. The **Pre UnInstall Summary** dialog is displayed.

If you want to change any of your choices, click **Back** to step back through the dialogs to the appropriate point. You can then restart the uninstallation process from that point.

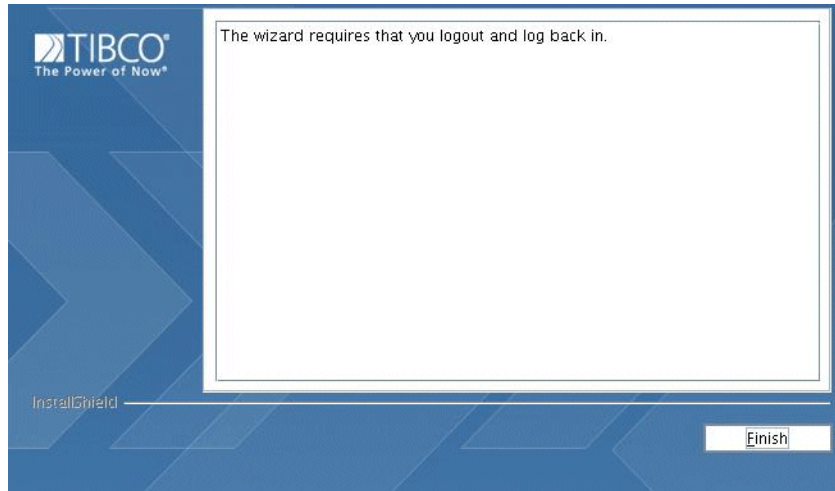

7. When you are satisfied with your choices, click **Uninstall**.

The uninstaller removes the software product you specified.

The TIBCO Business Studio iProcess Add-in entries in the Start menus may appear after the uninstallation. To correct this log out, then log in again.

- (Linux only) - If an error message similar to the following is displayed after uninstallation, log out and log in again for the uninstaller changes to take effect:

Using Add/Remove Programs (Windows Only)

To remove the installation using the **Add/Remove Programs** option on your PC:

1. Log in to Windows as a user with system administrator privileges. You must have system administrator privileges to uninstall this software.
2. In the **Control Panel**, double-click the **Add or Remove Programs**.
3. In the **Add/Remove Programs** dialog, select **TIBCO Universal Installer** (*installation_environment_n*), where *installation_environment_n* is the directory corresponding to the installation environment you want to uninstall. If you have installed more than one TIBCO product, there will be multiple entries in **Add/Remove programs** (for example, **TIBCO Universal Installer (c:\tibco\env_1)**, **TIBCO Universal Installer (c:\tibco\env_2)**, and so on).
4. Click **Change/Remove**.

The uninstaller launches. Follow the uninstallation steps in [Using the Uninstaller on page 8](#).

The uninstaller may not completely remove files that have been modified since the initial installation (for example, the **configuration** directory and the Asset Central **repository** and **logs** directories). Verify that the Asset Central repository contains all your source files and their history. If you do not need any of the other remaining files, manually delete them.
