New Features

The following new features have been added to version 6.0.0 of TIBCO ActiveMatrix BusinessWorks™ Plug-in for Trillium.

Accessing Trillium Cleanser Services

- **Cleanse Activity:** You can use this activity to send data to a Cleanser service running on Trillium Software Director and receive cleansed data.

Accessing Trillium Matcher Services

- **MatchWindow Activity:** You can use the Match Window activity to send multiple records to a Matcher service running on Trillium Software Director which returns zero or more matches from a match window of records identified by the Matcher server. When it finds duplicate data during the match process, it adds the records to the match window and generates a unique key for each record.
- **MatchReference Activity:** You can use the Match Reference activity to access a Matcher service running on Trillium Software Director. It finds out many records in the match window and returns matched patterns for the matching candidate.
