New features

The add-on was updated to ensure compatibility with JDK 17.

Changes in Functionality

This release includes no updated functionality.

Changes to third-party libraries

The FasterXML jackson-databind library was updated to version 2.16.0.

Closed Issues

This release contains the following closed issues:

- **[DQID-3624]** An error occurs when exporting a PDF file. The chart name of the W-I05, T-I16, F-I22 and F-I23 indicators are exported incorrectly.
- **[DQID-3625]** An error occurs when exporting a PDF file. The sparkline chart of D-I10 indicator is not displayed.
- **[DQID-3626]** In the Dashboard, the pie chart of W-I05 indicator is not displayed.

Known Issues

This release contains the following known issues:

- Dashboard export: There are several differences in styles between the charts on browsers and those in the exported files.
- If using a Postgres 9.2 database and you want to replicate add-on tables, table names cannot be longer than 63 characters.
- Flat data report: Dynamic labels and descriptions are not applied when directly accessing the table in the reporting datasets.
- Hierarchy view by data models on the **Indicator on D.E.C.** table: Orders of data elements may not be the same as in the data models.
- The date format used in the calendar and on chart axis annotations behaves as follows:
 - English: MM/dd/yyyy
 - French: dd/MM/yyyy
 - All other locales will follow English.
