New features.....5

Changes in Functionality..... 5

Changes to third-party libraries..... 5

Closed Issues.....5

Known Issues..... 5

New features

This release includes the new `ebx.addon.dama.convert.officeFiles.to.pdf` property. By default, this property is set to `true` and it determines whether assets that are Microsoft Office files get automatically converted to PDFs on start up. See *Disabling automatic asset to PDF conversion* for more information.

Changes in Functionality

This release contains no changes in functionality.

Changes to third-party libraries

The following third-party libraries were updated:

- The Apache Commons Compress library was updated to version 1.26.0.
- The Apache Commons IO library was updated to version 2.12.0.

Closed Issues

[EBXDAMA5-1814] The conversion of assets to PDFs increases the EBX® boot time.

Known Issues

This release contains the following known issues:

- DOCX files do not display correctly in previews.
- Searching for assets in the media-type field using quick search is not supported. However, when previewing some file types, such as PDFs, you can search for text within the file.
- When updating asset information in a child dataset, the parent dataset automatically updates also.
- The **Deactivated** state is available for users without sufficient rights to deactivate an asset.
- User can import a new version in 'Version management' tab from 'Information' button when 'Import new version' service is disabled.
- A user can import a new version of an asset without sufficient permissions.
- Confirm message is displayed after clicking on 'Download' button on the child dataset.
- The configuration is not updated for the supported file extensions after users access the Digital Asset Manager widget.
- The progress bar does not work properly when importing from a ZIP file.
- When running on Linux, the font used in DOCX, PPT, and PPTS files must be installed previous to uploading these assets. Otherwise, Vietnamese text does not display correctly in asset previews.
- Vietnamese text does not display correctly when viewing previews of DOC assets.
- PDF previews might not display correctly when using Internet Explorer.
- When accessing assets in an external Drive, error messages may display when selecting all assets. This can be the result of access limitations put in place by the third-party tool.

- Thumbnails of some uploaded SVG files do not display correctly.
