Changes in Functionality..... 5

Changes to third-party libraries..... 5

Closed Issues.....5

Known Issues..... 5

New features

This release was updated to ensure compatibility with TIBCO EBX® version 5.9.26.

Changes in Functionality

This release includes no updated functionality.

Changes to third-party libraries

This release contains no changes to third-party libraries.

Closed Issues

This release contains no closed issues.

Known Issues

This release contains the following known issues:

- Dashboard export: There are several differences in styles between the charts on browsers and those in the exported files.
- If using a Postgres 9.2 database and you want to replicate add-on tables, table names cannot be longer than 63 characters.
- Flat data report: Dynamic labels and descriptions are not applied when directly accessing the table in the reporting datasets.
- Hierarchy view by data models on the **Indicator on D.E.C.** table: Orders of data elements may not be the same as in the data models.
- The date format used in the calendar and on chart axis annotations behaves as follows:
 - English: MM/dd/yyyy
 - French: dd/MM/yyyy
 - All other locales will follow English.
