Changes in Functionality..... 5

Changes to third-party libraries..... 5

Closed issues..... 5

Known issues.....5

Released: April 2023

## New features

This release contains no new features.

## Changes in Functionality

In the user interface, the **Upload folder** field in the **Image configuration** table is now read-only. The default value is now `ebx_home/gram_img`. You can update this value using a Java environmental variable. For additional information, see *Graph view reference material > 'Image configuration' table* in the *User Guide*.

## Changes to third-party libraries

This release contains no third-party library updates.

## Closed issues

This release contains no closed issues.

## Known issues

This release contains no known issues.
