Changes in Functionality.....	5
Changes in third-party libraries.....	5
Closed Issues.....	5
Known Issues.....	5

## New features

This release contains no new features.

## Changes in Functionality

This release includes no updated functionality.

## Changes in third-party libraries

This release contains the following changes to third-party libraries:

- The JQuery library was updated to version 3.6.4.
- The Spring framework was updated to version 5.2.24.

## Closed Issues

This release contains the following closed issues:

- **[DQID-3540]** The Interval format displays incorrectly when executing an indicator on the Dynamic report.
- **[DQID-3530]** An exception is displayed when querying indicators.

## Known Issues

This release contains the following known issues:

- Dashboard export: There are several differences in styles between the charts on browsers and those in the exported files.
- Flat data report: Dynamic labels and descriptions are not applied when directly accessing the table in the reporting datasets.
- Hierarchy view by data models on the **Indicator on D.E.C.** table: Orders of data elements may not be the same as in the data models.
- The date format used in the calendar and on chart axis annotations behaves as follows:
  - English: MM/dd/yyyy
  - French: dd/MM/yyyy
  - All other locales will follow English.
