

TIBCO EBX® Insight Add-on (New) Release Notes

*Version 6.2.2
August 2025*

Table of contents

New features.....5

Changes in Functionality..... 5

Changes to third-party libraries..... 5

Closed Issues.....5

Known Issues..... 5

New features

This release contains the following new features:

- You can now drag and drop a section tabs to reorder them in the dashboard.
- Previously, the add-on returned a fixed number of indicator execution results when generating a graph. To better support the horizontal scroll feature, a pagination mechanism is now used to return results as users scroll through the graph.
- It is now possible to use an operator when filtering indicator results for a foreign key field.

Changes in Functionality

This release contains no changes in functionality.

Changes to third-party libraries

This release contains no changes to third-party libraries.

Closed Issues

This release includes the following closed issues:

- **[DPRA-2696]** An API authorization issue occurs for indicators in a dashboard.
- **[DPRA-2711]** In certain cases, an issue occurs that prevents users from creating a dashboard.
- **[DPRA-2725]** When a referenced table has a composite primary key, a filter of foreign key records only returns a single page (10 records) of results.

Known Issues

This release contains the following known issues:

- **[DPRA-2704]** There is a limitation when filtering on a foreign key field where a label is specified in the data model. The following operators cannot be used in this case: starts with, ends with, contains, and is different.
- The following data types are not currently available for indicators to monitor:
 - multi-value foreign keys
 - associations
 - multi-value groups
- Validation of configuration data after importing it from an archive file is not supported.
