Known Issues.....	5

New features

This release was updated to ensure compatibility with TIBCO EBX® version 6.1.3 and the Add-ons Bundle version 6.1.3.

Changes in Functionality

This release includes no updated functionality.

Changes in third-party libraries

The Spring framework was updated to version 5.3.29.

Closed Issues

This release contains the following closed issues:

- **[DQID-3616]** An error occurs when exporting a PDF file. The chart name of the D-I03, W-I05, T-I16, and F-I22 indicators are exported incorrectly.
- **[DQID-3617]** An error occurs when exporting a PDF file. The sparkline chart of the D-I10, W-I05, W-I04, and F-I32 indicators are not displayed.
- **[DQID-3621]** In the Dashboard, the pie chart of W-I05 indicator is not displayed.
- **[DQID-3622]** Indicator D-I09's line chart timing is not exported correctly in the PDF file.

Known Issues

This release contains the following known issues:

- Dashboard export: There are several differences in styles between the charts on browsers and those in the exported files.
- Flat data report: Dynamic labels and descriptions are not applied when directly accessing the table in the reporting datasets.
- Hierarchy view by data models on the **Indicator on D.E.C.** table: Orders of data elements may not be the same as in the data models.
- The date format used in the calendar and on chart axis annotations behaves as follows:
 - English: MM/dd/yyyy
 - French: dd/MM/yyyy
 - All other locales will follow English.
