## New features

The add-on was updated to ensure compatibility with TIBCO EBX® 6.2.2 and the Add-ons Bundle 6.2.2.

## Changes in Functionality

This release contains no functionality changes.

## Changes to third-party libraries

This release contains no changes to third-party libraries.

## Closed Issues

This release contains no closed issues.

## Known Issues

This release contains the following known issues:

- Dashboard export: There are several differences in styles between the charts on browsers and those in the exported files.
- Flat data report: Dynamic labels and descriptions are not applied when directly accessing the table in the reporting datasets.
- Hierarchy view by data models on the **Indicator on D.E.C.** table: Orders of data elements may not be the same as in the data models.
- The date format used in the calendar and on chart axis annotations behaves as follows:
  - English: MM/dd/yyyy
  - French: dd/MM/yyyy
  - All other locales will follow English.
