FTL Channel Coordination Form

The eFTL application developer, the eFTL administrator, and the FTL administrator can use this form to coordinate the interactions between the eFTL and FTL communication infrastructures. Use one form for each FTL channel.

Channel Name

Names of Related FTL Applications

Endpoints: List the FTL application's endpoints for communicating with this eFTL channel.

FTL Exchange Format: The eFTL service forwards messages to the related FTL application in this format.

Authorization Groups: Copy the names of authorization groups from the application coordination forms of the applications that use this channel.
