## How to Contact TIBCO Support

You can contact TIBCO Support in the following ways:

- For an overview of TIBCO Support, visit <http://www.tibco.com/services/support>.
- For accessing the Support Knowledge Base and getting personalized content about products you are interested in, visit the TIBCO Support portal at <https://support.tibco.com>.
- For creating a Support case, you must have a valid maintenance or support contract with TIBCO. You also need a user name and password to log in to <https://support.tibco.com>. If you do not have a user name, you can request one by clicking Register on the website.

## How to Join TIBCO Community

TIBCO Community is the official channel for TIBCO customers, partners, and employee subject matter experts to share and access their collective experience. TIBCO Community offers access to Q&A forums, product wikis, and best practices. It also offers access to extensions, adapters, solution accelerators, and tools that extend and enable customers to gain full value from TIBCO products. In addition, users can submit and vote on feature requests from within the [TIBCO Ideas Portal](#). For a free registration, go to <https://community.tibco.com>.

# New Features

---

This is the first release of TIBCO Flogo® Connector for Data Conversion. This connector offers the following features:

## **Parse Copybook Data Activity**

This activity parses incoming data according to the selected Copybook connection. After parsing, the output data conforms to the schema generated by the Copybook connection, and other activities can access the data.

## **Render Copybook Data Activity**

This activity accepts data from other activities and produces data according to the COBOL copybook held in a selected Copybook connection. The COBOL data can then be passed to an application.

## Known Issues

---

The following issue exists in this release of TIBCO Flogo® Connector for Data Conversion.

Key	Summary
FGDCNV-78	<p><b>Summary:</b> When an existing copybook is modified, the changes are not automatically reflected in activities that use that copybook.</p> <p><b>Workaround:</b> You can refresh the studio page, navigate to a flow that uses the modified copybook and click every Parse and Render activity that uses the copybook.</p>
