How to Join TIBCO Community

TIBCO Community is the official channel for TIBCO customers, partners, and employee subject matter experts to share and access their collective experience. TIBCO Community offers access to Q&A forums, product wikis, and best practices. It also offers access to extensions, adapters, solution accelerators, and tools that extend and enable customers to gain full value from TIBCO products. In addition, users can submit and vote on feature requests from within the [TIBCO Ideas Portal](#). For a free registration, go to <https://community.tibco.com>.

New Features

The following are some of the key features of TIBCO Flogo[®] Connector for SugarCRM.

SugarCRM Connection

The SugarCRM connection contains all the parameters required to connect to the SugarCRM REST API. The SugarCRM connection is used by all the activities in the SugarCRM category.

Beginning with version 1.3.2, the SugarCRM connector supports the Campaigns module for all activities and triggers.

- ReceiveSugarCRMMessage Trigger

The SugarCRM trigger now supports multi-handler mode. A single trigger can execute multiple different flows, and multiple triggers can drive the same flow.

The SugarCRM server provides a facility called Web Logic Hooks with which records that have been created, deleted and changed can be forwarded periodically to other services. The ReceiveSugarCRMMessage trigger is a REST endpoint which accepts posted data from a Web Logic Hook of the SugarCRM server.

- SugarCRMCreate Activity

This activity is used to create a record for SugarCRM.

- SugarCRMQuery Activity

This activity is used to query SugarCRM for the details of any record in any module. Records can be explicitly selected by their ID field or can be filtered.

- SugarCRMUpdate Activity

This activity is used to update a single record in SugarCRM.

- SugarCRMDelete Activity

This activity is used to delete a specified record from SugarCRM.

The TIBCO Flogo[®] Connector for SugarCRM now supports SugarCRM version 9.2.

Known Issues

The following issue was identified in this release of TIBCO Flogo® Connector for SugarCRM.

Key	Summary
WISCRM-183	<p>Summary: When importing an older flow, the Connection and Module fields for the ReceiveSugarCRMMessage trigger are not populated by default.</p> <p>Workaround: Re-select the values for the Connection and Module fields from their respective drop-downs.</p>
