

Special Notes for TIBCO® Enterprise Foresight® and TIBCO® Enterprise Foresight® Healthcare Add-on

TIBCO® Enterprise Foresight® and TIBCO® Enterprise Foresight® Healthcare Add-on are SKUs that consolidate products previously sold under the TIBCO Foresight brand. TIBCO Enterprise Foresight contains capabilities that automate the validation, translation, and management of EDI business transactions at scale and in a high-performant way, according to industry standards, organizational guidelines, and specific business rules. TIBCO Enterprise Foresight Healthcare Add-On is an add-on package to TIBCO Foresight Enterprise, containing capabilities that automate the validation of EDI transactions with your healthcare business partners according to HIPAA-related industry standards. (the add-on is not available outside the United States.)

TIBCO Enterprise Foresight includes the following components:

- TIBCO Foresight EDISIM
- TIBCO Foresight Instream Standard
- TIBCO Foresight Translator
- TIBCO Foresight Translator Attachment Adapter
- TIBCO BusinessConnect EDI Protocol powered by Instream
- TIBCO ActiveMatrix BusinessWorks Plug-in for EDI
- TIBCO Foresight Transaction Insight
- TIBCO ActiveMatrix BusinessWorks Plug-in for HL7
- TIBCO ActiveMatrix BusinessWorks Plug-in for HL7 with FHIR

TIBCO Enterprise Foresight Healthcare Add-on includes the following components:

- TIBCO Foresight Instream Healthcare Edition
- TIBCO Foresight Instream MAC Adapter
- TIBCO Foresight HIPAA Validator Desktop

Various expansion packs, such as “TIBCO Foresight XYZ Expansion - 50k transactions per day” are not required for TIBCO Enterprise Foresight and TIBCO Enterprise Foresight Healthcare Add-on because the unit of measure has changed from “Transactions” per time period, to “Each”. We do require the reporting of transaction count for TIBCO Foresight Instream, which will help us optimize performance.

TIBCO Foresight Transaction Insight, a component included in TIBCO Enterprise Foresight, contains functionalities previously available in the following components:

- TIBCO Foresight Transaction Insight Healthcare Edition
- TIBCO Foresight Archive & Retrieval System
- TIBCO Foresight Archive & Retrieval System Healthcare Edition
- TIBCO Foresight Operational Monitor
- TIBCO Foresight Operational Monitor Healthcare Edition
- TIBCO Foresight Enrollment Correction Manager
- TIBCO Foresight Payment Correction Manager

- TIBCO Foresight Claims Correction Manager

If you have a license for TIBCO Enterprise Foresight, you are entitled to TIBCO BusinessConnect EDI Protocol powered by Instream (“BC EDI Protocol”), which includes the same functionality available in TIBCO BusinessConnect EDI Protocol HIPAA Edition powered by Instream (“BC HIPAA Protocol”). However, you need to license TIBCO Enterprise Foresight Healthcare Add-on to access TIBCO Foresight Instream Healthcare Edition (“Instream Healthcare”). If you don’t have a license to TIBCO Enterprise Foresight or TIBCO Enterprise Foresight Healthcare Add-on, and you want access to Instream Healthcare to work with your standalone TIBCO BusinessConnect, you need to license the standalone BC HIPAA Protocol.

Also, if you have a license for TIBCO Enterprise Foresight, you are entitled to TIBCO ActiveMatrix BusinessWorks Plug-in for EDI Standard Edition (“BW EDI Plug-in”), which includes the same functionality available in TIBCO ActiveMatrix BusinessWorks Plug-in for EDI Healthcare Edition (“BW Healthcare Plug-in”). However, you need to license TIBCO Enterprise Foresight Healthcare Add-on to access Instream Healthcare. If you don’t have a license to TIBCO Enterprise Foresight or TIBCO Enterprise Foresight Healthcare Add-on, and you want access to Instream Healthcare to work with your standalone TIBCO ActiveMatrix BusinessWorks (“BusinessWorks”), you need to license the standalone BW Healthcare Plug-in.

If you license TIBCO Enterprise Foresight, and you want to use BC EDI Protocol, you need TIBCO BusinessConnect, a capability included in TIBCO Platform. Similarly, if you license TIBCO Enterprise Foresight and you want to use BW EDI Plug-in, you need BusinessWorks, a capability included in TIBCO Platform.
