## Introduction

As a result of the ibi™ Golden Key licensing model, you can take advantage of all major product features and functionality, which are listed below as included in the licensor software.

Additional features and functionality which are not included in the tables below, will require you to obtain the appropriate license for such use from ibi™. It is your responsibility to ensure you obtain an appropriate license for use. For further information, including a listing of features and options that require additional license fees, please refer to this [license information page](#).

This document covers the following topics:

- [ibi™ WebFOCUS®](#)
- [ibi™ Data Migrator](#)
- [ibi™ FOCUS®](#)
- [ibi™ iWay® Service Manager](#)
- [ibi™ Omni-Gen® DQ](#)
- [ibi™ Omni-Gen® MDM](#)
- [ibi™ Omni-HealthData®](#)
- [ibi™ Omni-Insurance®](#)
- [ibi™ Law Enforcement Foundation](#)

## ibi™ WebFOCUS®

The following table lists and describes the packaging of ibi™ WebFOCUS® Basic Edition, Standard Edition, and Enterprise Edition.

### ibi™ WebFOCUS® Basic Edition, Standard Edition, and Enterprise Edition Contents

- **Reporting Server**

Provides data access, number crunching, and report generation functionality for ibi™ WebFOCUS®. The Reporting Server also provides a wide range of capabilities and tools for adapter configuration, metadata creation, application and path management, security control, communications configuration, and for monitoring, tuning, and troubleshooting.

- **ReportCaster**

Through ReportCaster, you can schedule a report to run at specific times or intervals, which can then be distributed through email or FTP servers, to printers, or to the Repository that stores Report Library and Managed Reporting reports. You can distribute an entire report or you can break a report into sections using the burst feature. When you burst a report, you send only the relevant report sections specified.

- **Analytics Anywhere**

Create interactive reports and charts for offline analysis. All of the content that you prepare functions independently of a server, and is portable, making it easy for your users to work with and analyze complex data without requiring the use of an external application.

- **Standard Adapters**

Provide direct connectivity to any database, application, and other information sources on any platform. To view the full list of standard adapters that are available to you, unlimited, out-of-the-box, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#). The document also includes a separate list of other adapters which are accessible in the package but require additional license fees.

- **Mobile Enablement**

Empowers users to perform reporting and analysis from their mobile devices. Deliver rich, deep, highly interactive analytic functionality, fully exploiting the native device gestures that are already familiar to the user. You can manipulate data from a variety of sources in an almost unlimited number of ways in just a couple of taps. Manage business dashboards and content, even when you are offline.

- **Connect to 3<sup>rd</sup> Party Visualization**

Empower any visualization tool with all of the benefits of data virtualization – realtime, direct access to data without the need for an expensive data warehouse. In addition, supply connectivity to any enterprise data source. Make better decisions with better data, all while using the tool your business users are already familiar with.

- **Portal Users**

Provides an analytics content management and deployment system that is essential for multi-user deployments. Enable your end users to consume, organize, personalize, and explore analytical content. It also allows BI developers and administrators to manage the deployment, access, and presentation of governed content to users.

- **Predictive Analytics**

Predictive analytics is the art of using analysis to predict trends, behaviors, and conditions. allows for forward-looking planning, enabling companies to adjust their current strategies to ensure the best possible outcomes. Using specific software applications, individuals can determine risk and solve current problems.

- **Location Analytics**

Combine GIS and BI analytics to allow the recognition of patterns in your data, including the visualization and discovery of geospatial outliers. Create maps that help you illustrate or identify trends so you can quickly take action.

- **Web Service APIs**

A key component in embedded BI solutions, RESTful web services provide API integration for your development team.

- **Usage Monitoring**

Provides a real-time, 360-degree view of your ibi™ WebFOCUS® deployment and all associated information assets, including the Reporting Server, database server, and mid-tier application, as well as usage of your users.

- **ETL (ibi™ Data Migrator)**

ibi™ Data Migrator dramatically simplifies data integration. It provides fast, flexible, end-to-end extract, transform, and load (ETL) process creation involving any data structure across disparate computer platforms.

- **Search**

Advanced and intuitive search functionality allows you to quickly access content across the repository. Using a text bar found on the Home Page, you can enter a search term to quickly display all content items that match that term. The interactive search engine updates the suggestions as you type, so you can find the desired item fast.

- **Maintain/Modify**

Create web-based data maintenance applications. Using Maintain and its multi-platform 4GL language, you can easily create, test, and deploy complex business applications that span the Internet, IBM mainframes, midrange servers, and workstations.

- **Authoring: Designer (InfoAssist)**

Designer is a web-based development tool that you can use to quickly and easily create content from your data and use that content to create pages, within a single visualization or by assembling multiple distinct content items into a separate visualization. You can manage your data using data flows and use that data to create charts, reports, and interactive and responsive pages, all in one place.

- **App Studio**

App Studio is a Windows-based graphical user interface (GUI) environment for creating advanced reporting applications. App Studio offers a simplified user experience and workflow, empowering developers to create application content immediately, without a costly and time-consuming learning curve.

## ibi™ Data Migrator

The following table lists and describes the packaging of ibi™ Data Migrator.

### ibi™ Data Migrator Contents

- **Data Migrator (ETL) Server**

Executes and deploys the data and process flows from which a data warehouse, data mart, or other data targets are constructed.

- **Data Management Console**

Simplifies all of the major tasks required to build data flows and process flows, and create, manipulate, and access the metadata associated with those flows.

- **Standard Adapters**

Provide direct connectivity to any database, application, and other information sources on any platform. To view the full list of standard adapters that are available to you, unlimited, out-of-the-box, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#). The document also includes a separate list of other adapters which are accessible in the package but require additional license fees.

## ibi™ FOCUS®

The following table lists and describes the packaging of ibi™ FOCUS®.

### ibi™ FOCUS® Contents

- **InDocument Analytics (Active Reports)**

Create interactive reports and charts for offline analysis. All of the content that you prepare functions independently of a server, and is portable, making it easy for your users to work with and analyze complex data without requiring the use of an external application.

- **FOCLOG**

FOCLOG is a tool for recording and analyzing the use of FOCUS for your entire site. It comes packaged with a set of standard analytical reports that allow you to interrogate FOCUS usage—identify usage spikes and redundancies, detect large report requests, analyze time-of-day usage trends, and monitor ad hoc versus scheduled requests for each user.

- **zIIP**

The zIIP (System z Integrated Information Processor) engine is microcoded at installation time to run specific types of workloads. It concentrates on CPU intensive workloads, leaving the Central Processor more time to absorb otherwise queued workloads, thereby achieving some overall performance improvement across all mainframe activity.

- **COBOL File Description (FD) Translator**

The COBOL FD Translator is a productivity tool that enables you to write reports from files described to COBOL. It creates Master Files automatically, based on information from the specified COBOL FD and your translation selections.

- **Report Generator and Dialogue Manager**

- **Data Sources: FOCUS, VSAM, and Sequential files**

- **Screen Manager, Full Screen Editor, Screen Painter, FOCUS Security, and Relational JOIN Facility**

- **Extended Matrix Reporting**

- **Data Export (PDF, Excel)**
- **Read/Write Access to FOCUS Database Manager, Transaction Processor, and Interactive Database Editor**

## ibi™ iWay® Service Manager

The following table lists and describes the packaging of ibi™ iWay® Service Manager.

### ibi™ iWay® Service Manager Contents

- **Transformation Engine and All Listeners**
- **Business Service Provider**
- **Real-Time Replication Option**
- **Utility Adapter Bundle**
  - XML for Files, Print, XML RDBMS, and Email
  - LDAP Adapter
  - All Network Adapters
  - Log Event Adapter
  - SQL High-Water Mark Adapter
- **Streaming File Extension**
- **Unlimited Workbench Users and Standard Adapters**

To view the full list of **standard adapters (included)** and **premium adapters (additional purchase)** that are available, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#).

## ibi™ Omni-Gen® DQ

The following table lists and describes the packaging of ibi™ Omni-Gen® DQ.

### ibi™ Omni-Gen® DQ Contents

- **Omni-Gen Server and Console**

- **Governance Consoles**
- **Data Quality Server**
- **All Standard Adapters**
- **ibi™ iWay® Service Manager**
- **ibi™ Data Migrator**

To view the full list of **standard adapters (included)** and **premium adapters (additional purchase)** that are available, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#).

## ibi™ Omni-Gen® MDM

The following table lists and describes the packaging of ibi™ Omni-Gen® MDM Basic Edition and Enterprise Edition.

### ibi™ Omni-Gen® MDM Basic Edition and Enterprise Edition Contents

- **Omni-Gen Server and Console**
- **Governance Consoles**
- **Customer Data Model**
- **Data Quality Server**
- **Pre-defined DQ Rules**
- **Mastering and Governance Rules**
- **Pre-packaged ibi™ WebFOCUS® Reports**
- **Master Data Edition**
- **All Standard Adapters**
- **ibi™ iWay® Service Manager**
- **ibi™ Data Migrator**

- **ibi™ WebFOCUS® Restricted User - 10 User Basic Pack**

To view the full list of **standard adapters (included)** and **premium adapters (additional purchase)** that are available, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#).

## ibi™ Omni-HealthData®

The following table lists and describes the packaging of ibi™ Omni-HealthData® Basic Edition and Enterprise Edition.

### ibi™ Omni-HealthData® Basic Edition and Enterprise Edition Contents

- **ibi™ Omni-Gen® MDM Components**
- **Extendable healthcare repository for masters and transaction data with history**
- **Healthviews (Consumable Business Views Reporting)**

To view the full list of **standard adapters (included)** and **premium adapters (additional purchase)** that are available, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#).

## ibi™ Omni-Insurance®

The following table lists and describes the packaging of ibi™ Omni-Insurance™ Basic Edition and Enterprise Edition.

### ibi™ Omni-Insurance™ Basic Edition and Enterprise Edition Contents

- **ibi™ Omni-Gen® MDM Components**
- **Enterprise P&C Data Repository**
- **Customer-centric Views of Policy and Claimholder**
- **Pre-built Reports and Dashboards**
- **Entry-level Reporting**
- **Includes a single ibi™ WebFOCUS® Basic Edition**

To view the full list of **standard adapters (included)** and **premium adapters (additional purchase)** that are available, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#).

## ibi™ Law Enforcement Foundation

The following table lists and describes the packaging of ibi™ Law Enforcement Foundation Basic Edition and Enterprise Edition.

### ibi™ Law Enforcement Foundation Basic Edition and Enterprise Edition Contents

- **ibi™ WebFOCUS® Suite**
- **ibi™ iWay® Service Manager**
- **ibi™ Data Migrator**
- **Standard Adapters**
- **One Target Adapter**
- **ibi™ WebFOCUS® Search**
- **Apache Solr Adapter**

To view the full list of **standard adapters (included)** and **premium adapters (additional purchase)** that are available, see [ibi™ WebFOCUS® Omni™ Adapters Quick Reference](#).
