

TIBCO LogLogic LX Log Management Appliances

BENEFITS

DESIGNED FOR THE ENTERPRISE

Real-time monitoring and high-speed collecting, searching, and reporting specifically designed to meet the needs of the large global enterprise.

REDUCED TIME-TO-RESOLUTION

Real-time monitoring and alerting, plus automatic forwarding and filtering of data provide the right information to the right application, individual, or group, speeding response and remediation.

EASY TO DEPLOY, USE, AND MANAGE

Typical deployment in hours, not days or weeks; and an intuitive browser-accessible dashboard provides control over all log management appliances.

SUPPORT FOR IT BEST PRACTICES

Advanced forensics and workflow help you make sense of IT big data for security, compliance, and IT performance improvements.

AT A GLANCE:

Enterprise-level TIBCO LogLogic[®] LX appliances enable high-speed collecting, indexing, and analyzing of logs and IT big data from physical and virtual devices, on-premise and in the cloud. LX appliances help organizations get more value from their IT big data—providing the ability for real-time threat protection, support for compliance reporting and auditing, and information needed to improve IT operations performance.

REAL-TIME MONITORING, ANALYSIS, ALERTING

LX appliances provide local control over your global resources, reduce time to problem resolution, improve security and efficiency, and provide the means to improve IT management and ensure compliance with government regulations and industry mandates.

With Log Management Intelligence LX appliances, you can easily track VPN access, monitor the health of hardware and applications, and even perform change alerting. You can track the fluid provisioning of virtual environments and spot problems before they occur. With the system's open APIs, you can even create your own applications to interact with log data.

SOLUTIONS FOR PRESSING IT PROBLEMS

LX appliances handle billions of text and non-text messages daily, with collection rates of up to 10,000 messages per second. You can store up to 90 days of searchable data available for immediate access. These capabilities, plus Google-like search of indexed and non-indexed data, provide a strong base for solving your most pressing challenges.

You can collect all your data and make sense of it. With LogLogic advanced forensics workflow, you can investigate the present or recent past and answer “now” questions about what is happening in your network and how it is performing. Hundreds of easily configurable template reports can be used to provide exactly the information you need.

Customizable dashboard

ATTRIBUTES & CAPABILITIES

HIGH-SPEED DATA FILTERING AND FORWARDING

- Distributes IT data and alerts to third-party applications
- Efficiently uses network resources while reducing storage and management costs

REAL-TIME AND SCHEDULED REPORTS

- Stores 90 days of live data, with privacy controls
- Supplies up to 1 year of secured archived storage

SUPPORT FOR EFFICIENT COMPLIANCE REPORTING

- Supports TIBCO LogLogic® Compliance Suites reporting capabilities

POWERFUL ANALYTICS TOOLSET

- Provides summary reports, real-time alerting, and real-time data forensics
- Supports your own custom tagging of log sources and searching on these labels

OPEN AND EXTENSIBLE

- Includes an open API for adding or extending analysis capabilities
- Uses open-forwarding technology for logs and NetFlow messages
- Supports data masking (anonymized data) for enhanced security

	LX825	LX1025	LX4025	LX1025R1	LX4025R1
Peak messages per second (MPS)	5,000	99,000	130,000	99,000	130,000
Sustained MPS	1,500	5,000	5,000	5,000	5,000
Supported Devices	8,000	16,000	16,000	16,000	16,000
Raw Storage (HDD)	1 TB	1 TB	8 TB	1 TB	32 TB
Raw Storage (SSD)	--	--	--	--	6 TB
Maximum Retention	90 days	90 days	90 days	90 days	1 year
