New Features

No new features are added to version 8.0.1 of TIBCO Managed File Transfer (MFT) Platform Server for Windows.

Changes in Functionality

There are no changes in functionality in version 8.0.1 of TIBCO MFT Platform Server for Windows.

Deprecated and Removed Features

No features have been deprecated or removed as of version 8.0.1 of TIBCO MFT Platform Server for Windows.

Migration and Compatibility

You can migrate from versions 7.1.1, 7.2.0, and 8.0.0 to version 8.0.1 of TIBCO MFT Platform Server for Windows.

For migration, follow the procedure provided in the "Installation" section of the *TIBCO® Managed File Transfer Platform Server for Windows Installation* document.

TIBCO MFT Platform Server for Windows version 8.0.1 can transfer files with MFT Platform Server versions 7.1.1, 7.2.0, and 8.0.0.

TIBCO MFT Platform Server for Windows version 8.0.1 can transfer files with MFT Internet Server version 8.2, 8.3, and 8.4.

Closed Issues

The table lists closed issues in version 8.0.1 of TIBCO MFT Platform Server for Windows.

Key	Summary
PSW-878	Universal Installer was upgraded to V3.7.4 to remove log4j files.
PSW-872	The Platform Server service stopped when many initiator requests were executed at the same time for target node definitions.
PSW-857	When viewing Platform Server event log messages, the following event log error message was received: "The description for Event ID 265 from MFT Platform Server cannot be found."
PSW-854	When upgrading from version 7.2.0 to version 8.0.0, Platform Server was unable to reuse the version 7.2.0 service credentials. <div>  <p>To use the 7.2.0 service credentials, use REGEDIT to add a registry entry. Go to the registry folder: <code>\HKEY_LOCAL_MACHINE\SOFTWARE\Proginet\CyberFusion Server</code> Create the registry entry: "ServiceName" String Value: "ASNAS"</p> </div>
PSW-852	When a Log.txt record was truncated or corrupted, the Command Center collection or the audit poll failed and caused a Platform Server exception.
PSW-850	When a transfer with CRC checking was restarted, the restarted transfer failed or the restart disabled CRC checking.
PSW-839	When a directory transfer was performed with CRC validation, the second transfer failed if the first transfer performed a checkpoint restart.
PSW-836	When initiating a receive file transfer from z/OS with CRC enabled, the transfer failed with a "CRC Mismatch" error message.
PSW-833	When Platform Server for Windows initiated a restart of a file download from Platform Server for z/OS, the file received was corrupted.
PSW-830	When a user clicked on View > Past Transactions in the Platform Server Administrator, it took up to a minute for the past transactions page to be displayed.
PSW-805	When a directory send transfer failed, the audit record was incorrectly written with "TemporaryError=Yes".
PSW-801	Transfers initiated by Platform Server for IBMi that used DES , 3DES , Blowfish or BlowfishLong encryption caused a corrupt file.

Key	Summary
PSW-794	Under high volume conditions, memory utilization grew rapidly eventually leading to an Out of Memory condition.
PSW-789	A memory leak occurred when the collector executed and there were more than 500 audit records to be collected.
PSW-787	A network folder name could not be saved in the DNI scan directory due to access restrictions of the logged on user account.
PSW-786	When TIBCO MFT Platform Server for Windows issued a Send Command request to TIBCO MFT Platform Server for z/OS, TIBCO MFT Platform Server for z/OS detected a network error.
PSW-785	TIBCO MFT Platform Server for Windows transfers initiated by TIBCO MFT Command Center with AES encryption failed with the following error message: "Encrypt does not meet HIPAA regulations".
PSW-783	A CRC validation error message was displayed in the Event Viewer even though CRC checking was not enabled.
PSW-782	Additional debug trace entries were required for the directory list program.
PSW-776	When elliptical curve ciphers were used in the SSL or tunnel mode, the TLS session negotiation failed.
PSW-772	Directory transfers initiated by TIBCO MFT Command Center ignored the StopOnFailure parameter.
PSW-771	Responder transfers failed because of an intermittent service exception.
PSW-769	When HIPAA=Yes was defined in the node definition, the Tunnel transfers failed.
PSW-768	When a user set the Using SSL field to "SSL" in the Add Platform Node or Update Platform Node page of TIBCO MFT Command Center, the node definition was created as TLS tunnel node instead of SSL node.
PSW-767	When Command Center submitted a transfer with "Host Type=List Name", the submit transfer request failed with the following error message: "check "Empty List" list failed. List not found in cflist.cfg file."
PSW-763	User Profile and Responder Profile passwords earlier used a proprietary encryption algorithm; now the passwords use AES encryption.
PSW-752	When the server status was checked from TIBCO MFT Command Center, it did not show the version of TIBCO MFT Platform Server for Windows.
PSW-751	An exception was received when executing the fusing utility program.

Key	Summary
PSW-750	File transfers failed due to intermittent exceptions when reading the cfnode.cfg file.
PSW-746	When the FUSUTIL MKDIR command was executed, an "Access Denied" error could occur if a directory in the path could not be accessed.
PSW-744	Earlier the "SSLV3" protocol option could be selected on the SSL Settings page. Now, the "SSLV3" protocol option is removed from the SSL Settings page to disallow SSLV3.
PSW-742	When the CRC Checking field was set to "No" in the Add Platform Node page or Update Platform Node page, the CRC value in the node definition was incorrectly shown as "Default".

Known Issues

There are no known issues in version 8.0.1 of TIBCO MFT Platform Server for Windows.

TIBCO Documentation and Support Services

How to Access TIBCO Documentation

Documentation for TIBCO products is available on the TIBCO Product Documentation website, mainly in HTML and PDF formats.

The TIBCO Product Documentation website is updated frequently and is more current than any other documentation included with the product. To access the latest documentation, visit <https://docs.tibco.com>.

The [TIBCO Product Documentation](https://docs.tibco.com) website is updated frequently and is more current than any other documentation included with the product.

Product-Specific Documentation

Documentation for TIBCO® Managed File Transfer Platform Server for Windows is available on the [TIBCO® Managed File Transfer Platform Server for Windows](https://docs.tibco.com) Product Documentation page.

The following documents for this product can be found on the TIBCO Documentation site:

- *TIBCO® Managed File Transfer Platform Server for Windows Installation*
- *TIBCO® Managed File Transfer Platform Server for Windows User's Guide*
- *TIBCO® Managed File Transfer Platform Server for Windows Release Notes*

How to Contact TIBCO Support

You can contact TIBCO Support in the following ways:

- For an overview of TIBCO Support, visit <http://www.tibco.com/services/support>.
- For accessing the Support Knowledge Base and getting personalized content about products you are interested in, visit the TIBCO Support portal at <https://support.tibco.com>.
- For creating a Support case, you must have a valid maintenance or support contract with TIBCO. You also need a user name and password to log in to <https://support.tibco.com>. If you do not have a user name, you can request one by clicking Register on the website.

How to Join TIBCO Community

TIBCO Community is the official channel for TIBCO customers, partners, and employee subject matter experts to share and access their collective experience. TIBCO Community offers access to Q&A forums, product wikis, and best practices. It also offers access to extensions, adapters, solution accelerators, and tools that extend and enable customers to gain full value from TIBCO products. In addition, users can submit and vote on feature requests from within the [TIBCO Ideas Portal](https://community.tibco.com). For a free registration, go to <https://community.tibco.com>.
