Preface

TIBCO Nimbus™ Maps is a business process mapping application for business users. It provides the following core capabilities:

- Process authoring (Mapper license) using TIBCO's business friendly UPN (Universal Process Notation)
- The sharing of, and collaboration on, process maps with business stakeholders (Teamer license) so that they can review and comment on the content of a process map
- Process map versioning for traceability of changes
- Uploading, attaching and creating links to relevant process documentation

Connecting with TIBCO Resources

How to Join TIBCO Community

TIBCO Community is an online destination for TIBCO customers, partners, and resident experts. It is a place to share and access the collective experience of the TIBCO community. TIBCO Community offers forums, blogs, and access to a variety of resources. To register, go to the following web address:

<https://community.tibco.com>

How to Access All TIBCO Documentation

The latest documentation for all TIBCO products is available on the TIBCO Documentation site <https://docs.tibco.com>, which is updated more frequently than any documentation that might be included with the product.

How to Contact TIBCO Nimbus Support

For an overview of TIBCO Support, and information about getting started with TIBCO Support, visit this site:

<http://www.tibco.com/services/support>

Release Notes

- New Features
- Changes in Functionality
- Deprecated and Removed Features
- Closed Issues
- Known Issues

New Features

Flow Line Links

Users with the appropriate access rights can now add a link to a flow line in a process. Flow line links connect the output flow line of one diagram to the input flow line of another diagram located in the process repository. It is possible for a flow line to have multiple links.

When part of a process resides outside of the application you can mark the input or output flow line as externally connected.

Flow line links and external connections can also be deleted.

Further information on Flow Line Links is available in the following online help topics:

- Processes > Diagram Management > Linking Diagrams > Flow Line Links
 - Adding a Flow Line Link
 - Adding an External Connection
 - Removing a Flow Line Link

Activity IDs

Activity ID numbers will automatically be generated by the application when an activity is created, allowing the process viewers to reference and collaborate on diagram objects. Authors can change the activity ID numbers to help organize their process into a logical sequence. Additionally, authors have the option to toggle diagram activity ID numbers on or off.

Further information on Activity IDs is available in the following online help topic:

- Processes > Diagram Management > Editing Diagrams > Activity IDs

Changes in Functionality

There are no changes in functionality in this release of TIBCO Nimbus™ Maps.

Deprecated and Removed Features

No features are deprecated or removed in this release of TIBCO Nimbus™ Maps.

Closed Issues

The following are closed issues in TIBCO Nimbus™ Maps.

Key (ID SR)	Description
NIMW-5026 Case No. 01517383	When unlocking a draft map in the Web Server, the audit log was recording the action as 'Authorization Cancelled'.

Known Issues

There are no known issues for this release of TIBCO Nimbus™ Maps.
