TIBCO Spotfire for mobile apps documentation and support services

Documentation is available for TIBCO Spotfire® products developed to be used with mobile devices.

How to Access TIBCO Documentation

Documentation for TIBCO products is available on the TIBCO Product Documentation website, mainly in HTML and PDF formats.

The TIBCO Product Documentation website is updated frequently and is more current than any other documentation included with the product. To access the latest documentation, visit <https://docs.tibco.com>.

Product-Specific Documentation

The following documents for this product can be found on the TIBCO Documentation site.

- *TIBCO Spotfire® for Android*
- *TIBCO Spotfire® for Android Release Notes*

Guidance for developing analyses to be used by mobile devices can be found at the following locations.

- [Best practices for developing mobile applications with TIBCO Spotfire](#)
- [Create rich mobile applications in TIBCO Spotfire using "minimum page size"](#)
- [Adding Location or Machine Readable Capabilities to a Mobile-Ready Analysis](#)

Product System Requirements

For a list of system requirements for this product and other TIBCO Spotfire products, see [Spotfire system requirements](#).

How to Contact TIBCO Support

You can contact TIBCO Support in the following ways:

- For an overview of TIBCO Support, visit <http://www.tibco.com/services/support>.
- For accessing the Support Knowledge Base and getting personalized content about products you are interested in, visit the TIBCO Support portal at <https://support.tibco.com>.
- For creating a Support case, you must have a valid maintenance or support contract with TIBCO. You also need a user name and password to log in to <https://support.tibco.com>. If you do not have a user name, you can request one by clicking Register on the website.

How to Join TIBCO Community

TIBCO Community is the official channel for TIBCO customers, partners, and employee subject matter experts to share and access their collective experience. TIBCO Community offers access to Q&A forums, product wikis, and best practices. It also offers access to extensions, adapters, solution accelerators, and tools that extend and enable customers to gain full value from TIBCO products. In addition, users can submit and vote on feature requests from within the [TIBCO Ideas Portal](#). For a free registration, go to <https://community.tibco.com>.

For quick access to TIBCO Spotfire content, see <https://community.tibco.com/products/spotfire>.

TIBCO Spotfire® for Android Release Notes

These release notes are for the TIBCO Spotfire® for Android app. They are provided to inform you of new features, known issues, and issues from previous releases that have been closed.

New features

The following features have been added to version 1.2.1 of TIBCO Spotfire® for Android.

Updated to work with TIBCO Spotfire® Server version 7.14

Version 1.2.1 of TIBCO Spotfire® for Android has been updated so it works with Spotfire® Server version 7.14.

Higher resolution thumbnails

The TIBCO Spotfire® for Android app now has higher resolution thumbnail pictures when browsing for analyses. This makes it easier to identify the analysis without opening it.

Manual data refresh

You are now informed when the analysis you are viewing can be refreshed, and you can reload the data either immediately or when it is convenient to do so.

Migration and compatibility

There are no migration issues with version 1.2.1 of the Spotfire® for Android app.

Version 1.2.1 of Spotfire for Android requires the following.

- Android version 4.4 or later with Google Play Services installed.
 - A connection to TIBCO Spotfire® Server version 7.7 or later, or an account for TIBCO Cloud™ Spotfire®.
- 

The maximize visualization feature added in version 1.2.0 of the Spotfire® for Android app requires a connection to TIBCO Spotfire® Server version 7.12 or later.
- 

There are no known restrictions on the type of connection (such as VPN). If the mobile device can connect to the server from a web browser (over HTTP or HTTPS), the Spotfire® for Android app should also be able to connect. Because the app connects using dedicated web services, any security appliances or reverse proxies between the app and the server must be configured properly to allow those requests and responses to work.
- Basic authentication (user name and password), NTLM authentication, or OAuth authentication to a Spotfire Server that uses that authentication type.

Changes in functionality

Version 1.2.1 of the Spotfire® for Android app contains no changes in functionality.

Closed issues for Spotfire for Android app

Version 1.2.1 of the Spotfire® for Android app contains the following closed issues.

Key	Description
SAND-108	The app could stop unexpectedly when trying to open an analysis.

Key	Description
SAND-109	The app could stop unexpectedly if you double-tapped an analysis visualization to maximize it.
SAND-110	The app could stop unexpectedly if you returned to the library view after using another application.
SAND-112	The app could stop unexpectedly if you tried to connect to an NTLM-authenticated server without providing credentials.

Known issues

Version 1.2.1 of the Spotfire® for Android app contains no known issues.
